

UML diagrams and description for SWA assignment 20HS 3Ib from Christian Sommer <christian.sommer@students.fhnw.ch>

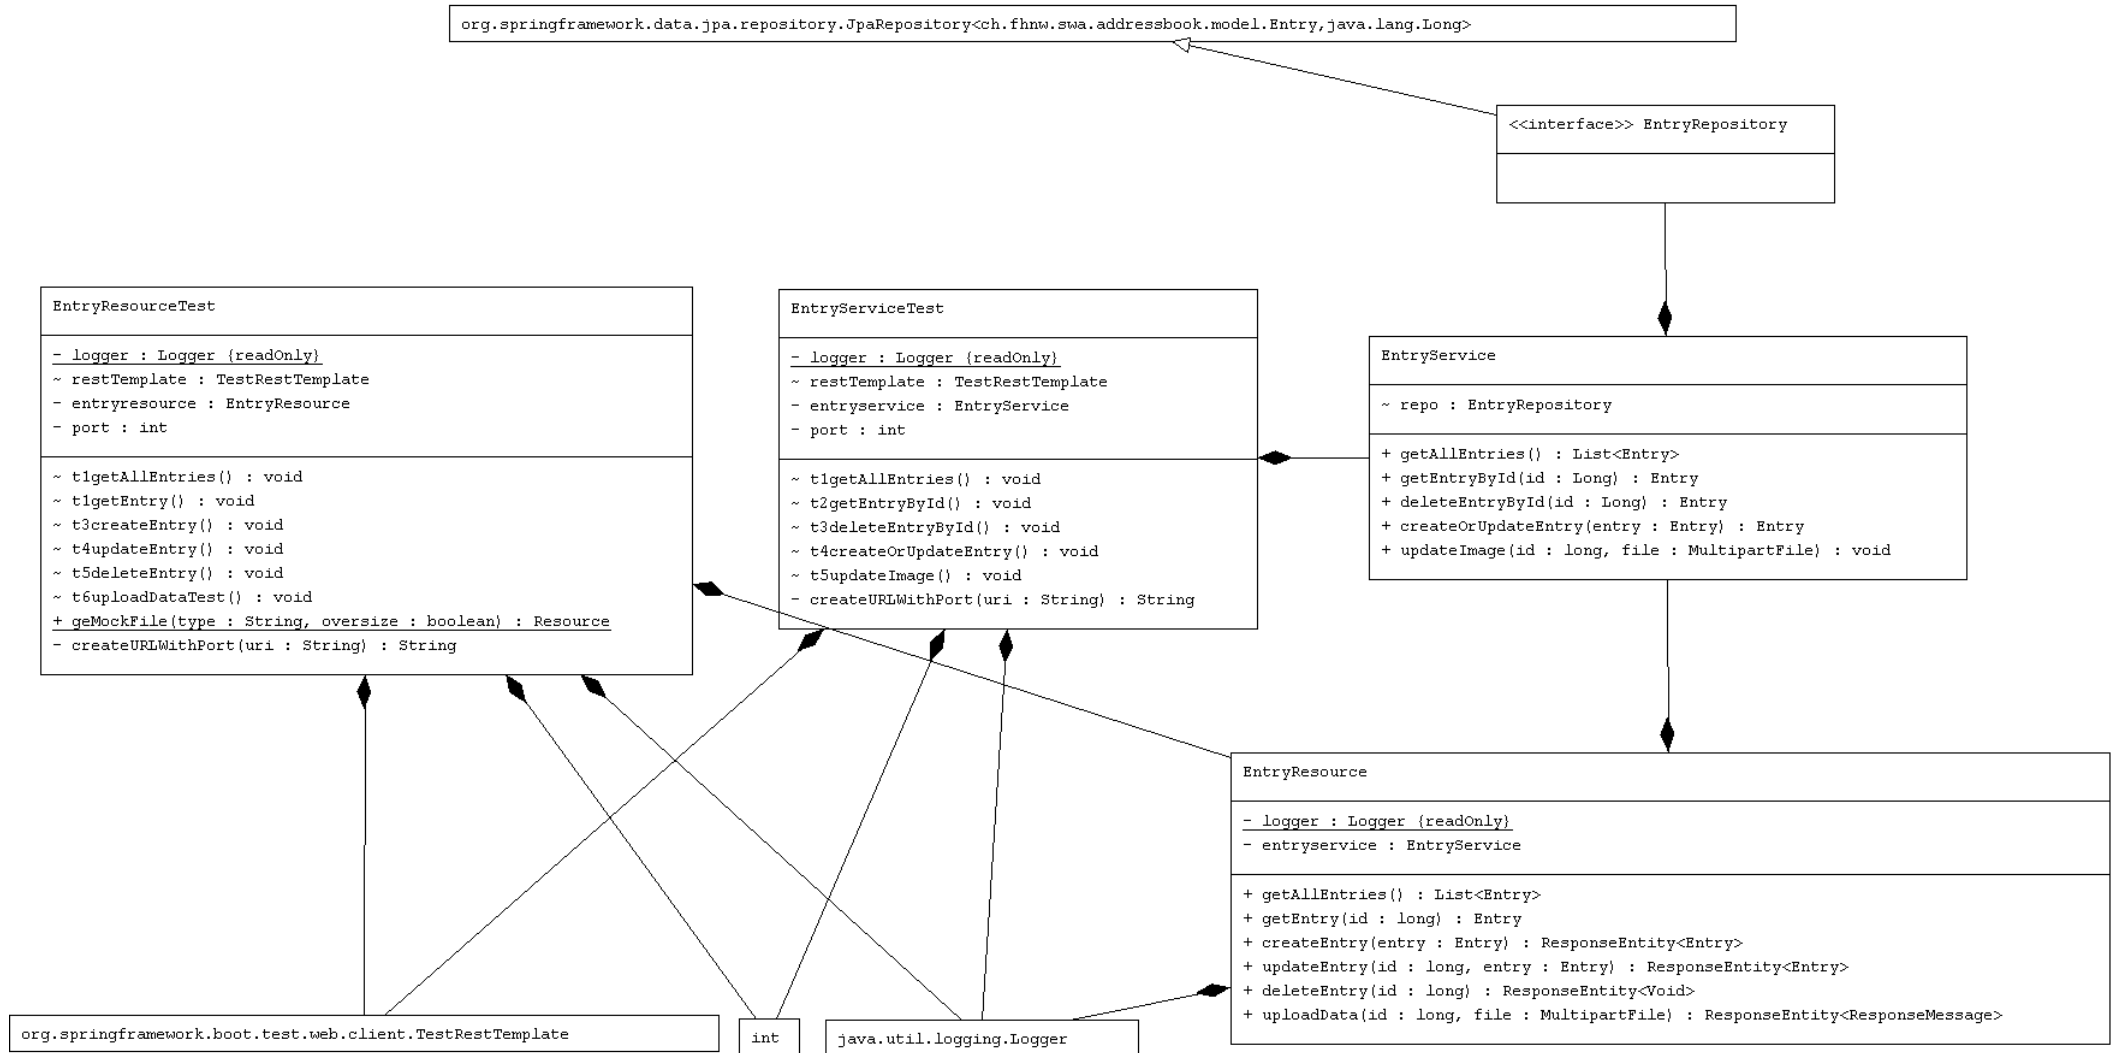

Entity: main entity in one Entry in the address book database.

Exeptions: EntryNotFoundException if requested entry not in database && FileUploadExeption for max file size exception handling

main classes: EntryResource as rest controller && EntryService as entity service

Frontend: main Components AddressbooApp for routing, EntryComponent to create or edit entry, EntryListComponent to list entrys, ImageComponent to upload a avatar for an entry and EntryDataService handle rest requests.
